CONTENTS

Original Papers

Theoretical Approach for the Interaction Parameters in Metallic Solutions	1
By Yoshio Waseda	
Stability of Emulsified Metal Particles in Slag and their Contribution to Reaction	13
By Shinya Kitamura and Nobuhiro Maruoka	
Stability of Oxide Inclusions in Si-Mn Killed Stainless Steel	18
By Shinya Kitamura, Hiroyuki Shibata and Tomoko Tanaka	
Partition of Phosphorous Oxide in Steelmaking Slag	24
By Shinya Kitamura, Hiroyuki Shibata and Shinya Saito	
Characteristic Structure and Morphology of Ferric Oxyhydroxides Formed by Corrosion of Iron-Aluminum and Iron-Phosphorus Alloys	30
By Katsuya Inoue, Sang-Koo Kwon, Kozo Shinoda, Shigeru Suzuki and Yoshio Waseda	
New Manufacturing Technology of Iron Based Metallic Foam	37
By Taichi Murakami and Eiki Kasai	
Application of the DEM in Simulation of the Media Motion in a Wet Bead Mill	46
By Dariusz Gudin, Junya Kano and Fumio Saito	
Promotion of Functional Thin Film by CVRD (Chemical Vapor Reductive Deposition)	55
By Masaki Yoshinaga, Katsutoshi Yamamoto and Atsushi Muramatsu	

“SOZAIKEN” is the abbreviation of SOZAI KOUGAKU KENKYUUTOU
(Advanced Materials Processing Building)

SOZAI means ORDINARY and NEW MATERIALS and KEN means RESEARCH
INSTITUTE,
